BEFORE:

How did you decide on what networking event to take part in?

How does this event reflect on your skills and / or your passions?

BEFORE:

How did you research the organization, event or person prior to you attending?

What did you learn?

BEFORE:

What are you most nervous about in preparing for your networking opportunity?

What are you doing to mitigate those concerns?

Look carefully of the criteria of the assignment, and choose your own way of reflecting your learning. Upload your assignment into your portfolio.

Let this assignment be a reflection of you!

AFTER:

Provide a thoughtful reflection on your networking experience.

DURING:

While you are at the event, take a picture or a short video of yourself for evidence of your attendance, dress etc. A video can include how you are currently feeling (if you are able to sneak away into a quiet corner!)

AFTER:

Looking back to your worries prior to attending the event, did they materialize?

Is there anything you would do differently prior to attending your next networking event?

DURING:

While you are at the event, have at least one meaningful two-way conversation with someone about your career or educational goals. Make sure you ask for their name (or better yet, a business card) and ask if it would be okay if you contact them in the future. Make sure their name, business name, and contact information are included in your assignment.
