

CAREERS IN SCIENCE

Biologist

[Video \(click Here\)](#)

[Salaries, skills & education \(click Here\)](#)

A biologist studies living organisms to understand how they function, using science to solve environmental and medical challenges.

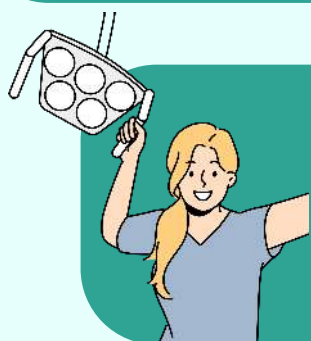

Chemistry Lab Manager

[Video \(click Here\)](#)

[Salaries, skills & education \(click Here\)](#)

A chemistry lab manager oversees laboratory experiments, applying scientific methods to ensure safe and accurate results.

Dental Hygienist

[Video \(click Here\)](#)

[Salaries, skills & education \(click Here\)](#)

A dental hygienist uses science to clean teeth, prevent dental diseases, and educate patients on oral health.

Dentist

[Video \(click Here\)](#)

[Salaries, skills & education \(click Here\)](#)

A dentist diagnoses and treats dental issues, using scientific knowledge of anatomy and oral health.

General Practitioner

[Video \(click Here\)](#)

[Salaries, skills & education \(click Here\)](#)

A general practitioner uses science to diagnose, treat, and prevent illnesses in patients.

A Geological Technologist

[Video \(click Here\)](#)

[Salaries, skills & education \(click Here\)](#)

A geological technologist applies science to study rocks and minerals, helping locate natural resources.

Landscape Architect

[Video \(click Here\)](#)

[Salaries, skills & education \(click Here\)](#)

A landscape architect uses science to design sustainable outdoor spaces that consider environmental impacts.

Licensed Practical Nurse

[Video \(click Here\)](#)

[Salaries, skills & education \(click Here\)](#)

A licensed practical nurse provides patient care, using science to understand treatments and medical conditions.

Medical Lab. Technologist

[Video \(click Here\)](#)

[Salaries, skills & education \(click Here\)](#)

A medical lab technologist analyzes samples in labs, using scientific techniques to aid in diagnoses.

CAREERS IN SCIENCE

Natural Science Policy Manager

[Video \(click Here\)](#)

[Salaries, skills & education \(click Here\)](#)

A natural science policy manager applies scientific research to develop policies that protect the environment.

Nursery and Greenhouse Worker

[Video \(click Here\)](#)

[Salaries, skills & education \(click Here\)](#)

nursery and greenhouse worker uses science to grow healthy plants and optimize growing conditions.

Optometrist

[Video \(click Here\)](#)

[Salaries, skills & education \(click Here\)](#)

An optometrist uses science to examine eyes, diagnose vision problems, and prescribe corrective lenses.

Pharmacist

[Video \(click Here\)](#)

[Salaries, skills & education \(click Here\)](#)

A pharmacist uses science to prepare medications and advise patients on their proper use.

Animal Health Technician

[Video \(click Here\)](#)

[Salaries, skills & education \(click Here\)](#)

An animal health technician uses science to assist veterinarians in diagnosing and treating animals.

Registered Nurse

[Video \(click Here\)](#)

[Salaries, skills & education \(click Here\)](#)

A registered nurse uses scientific principles to provide medical care and support patient health.

Researcher

[Video \(click Here\)](#)

[Salaries, skills & education \(click Here\)](#)

A researcher conducts scientific studies to discover new knowledge and develop innovative solutions.

Veterinarian

[Video \(click Here\)](#)

[Salaries, skills & education \(click Here\)](#)

A veterinarian uses science to diagnose and treat illnesses in animals, ensuring their health and well-being.
